aloha chair apo:

would you be kind enough to share this with the other council members.

the outdoor circle has asked the public to make testimony on wednesday relative to the Bill 16 cd2. they encourage a no vote.

the reason they encourage a no vote is that while they do "not oppose transit" their official position is that the project currently planned by the city has too many environmental impacts that have not been identified or properly mitigated.

councilman: can any entity possible be more disingenuous than the logic put forth by the outdoor circle. they are suggesting that notwithstanding the city following the proper legal guidelines in developing the eis, there are "environment impacts that are not yet identified".

clearly the outdoor circle is against "transit". they rely on the aia position given us by the distinguished architects that designed the aia award winning concrete monstrosities that have take the soul of hawaii from waikiki.

please give them their due by recognizing that according to their statements there will not ever come a time in their minds when the all the environmental impacts have been identified, and vote in favor of bill 16 cd2.

thank you  
 digger
